	Remote Control Guest Ex 12.50 (2016217)
Shipping date:	23rd of August 2016

Introduction

These Release Notes contain information related to a new release of Netop OnDemand. This release includes changes to the Netop OnDemand Pack 'n Deploy module, which is used for generating the OnDemand Host application along with the GuestEx application.

The Pack 'n Deploy utility does not require a license key.

In order to use version 12.50 of the Netop Remote Control GuestEx, a valid 12.50 product license key is required.

If you have questions about your license or wish to purchase an upgrade to Netop Remote Control GuestEx 12.50, please contact **Netop Customer Service** or your local Netop Partner for more information.

Support for WebConnect 3.0

In order to use Netop OnDemand Pack 'n' Deploy version 3.0 and the Netop OnDemand Host it produces, customers must first deploy, or subscribe to, a Netop WebConnect version 3.0 environment.

Netop OnDemand Pack 'n' Deploy version 3.0 has been optimized specifically for WebConnect version 3.0 and will not recognize prior versions of WebConnect as a communication device.

Netop Remote Control GuestEx version 12.50 is also a requirement for successful utilization of WebConnect 3.0.

Netop Remote Control GuestEx version 12.50 maintains support for prior versions of the OnDemand Host and WebConnect modules.

Additional information on Netop Remote Control version 12.50 and Netop WebConnect version 3.0 can be found on the Netop website at www.netop.com.
